

KOMATSU

D65EXi/PXi-18

Crawler dozer

Engine power
164 kW / 220 HP @ 1950 rpm

Operating weight
D65EXi-18: 21700 kg
D65PXi-18: 23100 kg

Blade capacity
3.69 - 5.61 m³

Increase your productivity by 100% with
next-generation intelligence

 **intelligent** / **2.0**
MACHINE CONTROL

Engine power

164 kW / 220 HP @ 1950 rpm

Operating weight

D65EXi-18: 21700 kg

D65PXi-18: 23100 kg

Blade capacity

3.69 - 5.61 m³

Intelligent Machine Control 2.0

- Improved automated operation from rough dozing to finish grade with new functions
- Lift layer control
- Quick surface creation
- Proactive dozing control
- Tilt steering control
- Two antennas supporting multiple GNSS
- Smart Construction Remote ready

Powerful and environmentally friendly

- Low consumption EU Stage V engine
- Unique torque converter with auto lock-up
- Adjustable auto idle shutdown
- Auto-decelerator

Optimised work equipment

- Sigmadozer® blade with hydraulic pitch
- Multishank parallelogram ripper

First-class operator comfort

- Quiet and comfortable cab
- Fully adjustable air-suspended seat
- Integrated rear-view camera

State-of-the-art controls

- Hydrostatic steering system with increased steering power
- Optimized automatic gear shifting with preset function
- Palm Command Control System (PCCS)
- Large multifunctional monitor with troubleshooting function

Tough and reliable

- Low-drive "PLUS" undercarriage
- Self-adjusting idler support
- Sturdy, rugged design
- LED lighting standard

Komtrax

- Komatsu Wireless Monitoring System
- 4G mobile communications
- Integrated communication antenna
- Increased operational data and reports

A maintenance program
for Komatsu customers

Intelligent Machine Control 2.0

Intelligent Machine Control (iMC) 2.0

With the D65EXi/PXi-18, you benefit from second-generation intelligent Machine Control (iMC 2.0). It continuously scans the jobsite and uses the data to plan the next pass. This leads to a huge increase in your productivity and accuracy with just the press of a button. The D65EXi/PXi-18 can work in automation modes almost continuously, is furnished with ergonomic one-touch controls, and allows any operator to work like a pro.

Quick surface creation

You can create a temporary design surface by just pressing a button. Begin stripping or spreading in automatic modes without needing final design data.

Tilt steering control

Helps you to maintain straight travel by continuously and automatically tilting the blade. This gives you a cleaner cut and higher productivity. Compared to a machine without tilt steering control, operator input is reduced by up to 80%.

Lift layer control

This function measures the terrain your machine tracks over and uses that data to plan the next pass. Automatic blade control will follow the finish surface and eliminate excess fill, potentially doubling your production.

Proactive dozing control

You can use automatic blade control from rough grading to finish grading work. Proactive dozing control understands the terrain in the path of each cut, maximises the blade load throughout the pass, regardless of the terrain ahead, and helps to achieve the same productivity as from an experienced operator.

Factory integrated

All components for machine control are installed during assembly at the Komatsu manufacturing facility, ensuring a reliable and high quality installation. Komatsu customer support is extended to the machine control system itself.

Two roof-mounted multi-GNSS antennas

Reliability is improved by two antennas supporting multiple GNSS systems: GPS, GLONASS, Galileo, BeiDou and QZSS. Excellent blade accuracy is maintained even when working on slopes or under shadows from obstructions.

Standard touchscreen control box

Factory-installed, it features a simple, easy-to-use operator interface. Mounted high for excellent visibility, viewing angle is adjustable per operator preference. It comes installed with a choice of 25 European languages.

Benefits of iMC 2.0

Proactive dozing control

- Up to 60% more productive*
- Applications: stripping topsoil, high-production dozing
- Uses data from previous pass to plan the next pass
- Automatic cut/strip from existing terrain
- Helps new operators perform like an experienced one

Lift layer control

- Lift time reduced by up to 50%**
- Applications: lifting, compaction quality control
- Maintain precise lift thickness
- Automatically spreads lift from existing terrain and helps prevent overfill
- Up to double the production

Tilt steering control

- Up to 80% less operator input required**
- Automatically tilts the blade to maintain straight travel while rough dozing
- Maintains consistent power to the ground and track

Improved finish grading

- Over-cutting (cutting too deep) reduced by up to 50%*
- Applications: Finish grading
- Analyses terrain and 3D model to proactively position blade in hard-to-grade areas
- Helps prevent overcutting at finish grade

Use automation throughout the entire process

Bidding

1. Stripping topsoil

2. Mass excavation

3. Finish grading

* Compared to previous iMC control method
** Compared to traditional methods

SMART CONSTRUCTION Remote

Smart Construction Remote is an optional software solution that enables to remotely send and update design plans even when the machine is offline. It also supports your operators remotely with shared screen control. Does an operator have an issue? Spare yourself that trip to the machine and resolve the problem from home, your office, or another jobsite. Smart Construction Remote works on our very own Komatsu iMC machines and several After Market GNSS systems powered by Windows and Android.

For further information on Smart Construction Remote please check out [Smart Construction.io](https://www.smartconstruction.io)

Automatic transmission

Set by default, the D65EXi/PXi-18 has a highly efficient transmission that automatically matches the best gear mode in all dozing operations and includes a travel speed preset function to reduce work time and fatigue for the operator. With Komatsu's ECMV (Electronic Controlled Modulation Valves) gear changes are smoothly timed to always keep the power transfer at maximum efficiency.

Torque converter with auto lock-up

Combined with the automatic transmission, the exclusive Komatsu automatic lock-up torque converter reduces fuel consumption by up to 10% by eliminating unnecessary power loss. When required, the powertrain control system engages the torque converter, or locks it up to send full engine power directly to the transmission during less torque demanding applications.

Adjustable idle shutdown

To reduce unnecessary fuel consumption and exhaust emissions, and for lower operating costs, the Komatsu auto idle shutdown automatically turns off the engine after it idles for a set period of time, which can be easily programmed from 5 to 60 minutes. An Eco-gauge and Eco guidance tips on the cab monitor further encourage efficient operations.

Powerful and environmentally friendly

Komatsu EU Stage V

The Komatsu EU Stage V engine is productive, dependable and efficient. With ultra-low emissions, it provides a lesser environmental impact and a superior performance to help reduce operating costs and lets the operator work in complete peace of mind.

Heavy-duty aftertreatment

The aftertreatment system combines a Komatsu Diesel Particulate Filter (KDPF) and Selective Catalytic Reduction (SCR). The SCR system injects the correct amount of AdBlue® at the proper rate to break down NOx into water (H₂O) and nontoxic nitrogen gas (N₂). NOx emissions are reduced by 80% vs. EU Stage IIIB engines.

- 1 KDPF
- 2 SCR
- 3 HPCR
- 4 Cooled EGR
- 5 KCCV
- 6 VGT

Exhaust Gas Recirculation (EGR)

Cooled EGR is a technology well-proven in current Komatsu engines. The increased capacity of the EGR cooler now ensures very low NOx emissions and a better engine performance.

High-Pressure Common Rail (HPCR)

To achieve complete fuel burn and lower exhaust emissions, the heavy-duty High-Pressure Common Rail fuel injection system is computer controlled to deliver a precise quantity of pressurised fuel into the redesigned engine combustion chamber by multiple injections.

Komatsu Closed Crankcase Ventilation (KCCV)

Crankcase emissions (blow-by gas) are passed through a CCV filter. The oil mist trapped in the filter is returned back to the crankcase while the filtered gas is returned to the air intake.

Variable Geometry Turbo (VGT)

The VGT provides optimal airflow to the engine combustion chamber under all speed and load conditions. Exhaust gas is cleaner, fuel economy is improved while machine power and performance are maintained.

Optimised work equipment

Sigmodozer® blade (EXi)

The middle section of Komatsu's Sigmodozer® blade acts like a V-shaped bucket with aggressive ground penetration. Its lateral blade edges help to push the rolling material continuously towards the centre. Combined with the blade's deep curve, this largely increases effective capacity and reduces spillage and fuel consumption. The blade's flat cutting edge and the standard pitch function also offer top grading performance. Overall, the Sigmodozer® blade increases dozing productivity by more than 15% compared to a conventional Semi-U blade.

Multishank parallelogram ripper (option)

The multishank parallelogram ripper has 3 ripper shanks as standard, but can be easily converted to a giant or two-shank ripper, depending on job conditions. The strong parallelogram design offers straight shank movement, adapted for tough applications.

Up to 15% higher production with the improved Sigmodozer® blade (left), compared to conventional Semi-U blade (right)

The Sigmodozer® blade offers highest material holding capacity

Semi-U blade

Komatsu blades

For increased blade performance and better machine balance, Komatsu uses a box blade design, with the highest resistance for a light weight blade. Special Komatsu highly wear resistant steel is used for the front and sides of the blade to increase durability. The deep curved design of the blade makes it easy to handle a wide range of materials, with good penetration and a large capacity, optimising high dozing performance with excellent fuel efficiency.

First-class comfort

Quiet and comfortable cab

Operator comfort is essential for safe and productive work. The cab on the D65EXi/PXi-18 is quiet and comfortable, an ideal environment to concentrate on the job. Its hexagonal design and large tinted glass windows offer excellent panoramic visibility. The high capacity and fully automatic climate control system pressurises the cab to keep dust out. A high quality sound-absorbent lining covers the interior to minimise noise levels for the operator. The operator can connect his mobile device to the machine's Bluetooth® radio.

Fully adjustable suspension seat and travel-control console

A comfortable, heavy-duty and fully adjustable heated air-suspended seat is at the centre of the operator's safe and cosy work space. For dozing operations, the seat faces straight forward, with a perfect view of both sides of the blade. For ripping, it can be turned 15° to the right to significantly improve rear visibility and reduce neck strain. The position of the travel control console can also be independently adjusted forwards, backwards and in height to fit each operator's preference.

Superior visibility on blade and ripper

The redesigned ROPS/FOPS integrated cab and the well-located operator seat give optimal blade visibility to the left and right and make both dozing and grading easy, safe and fast. To further improve safety and ripping efficiency, the special shape of the fuel tank gives the operator a clear view of the ripper point and of the dozer's back side.

State-of-the-art controls

Hydrostatic steering system

The hydrostatic steering system (HSS) offers fast response and more precise turning. Both tracks are powered without interruption allowing smooth, continuous turns and powerful and productive dozing even on soft ground or on slopes.

Gearshift preset function

To reduce the frequency of gear shifting and for comfortable machine operation, a shift preset mode is provided as standard equipment. The preset switch lets the operator select a combination of forward/reverse gear shifts by using the UP/DOWN shift switch on the steering lever. Once the shift pattern is selected, only forward/reverse direction control selection is required for a correct gear shift.

Easy and precise

The ergonomic Palm Command Control System (PCCS) provides efficient and comfortable steering. The new control levers are fingertip controlled for precise and fatigue-free operating. When backing up over shot rock or other rough surfaces, travel speed can be reduced with the "slow reverse" function to improve ride quality and decrease vibrations and fuel consumption.

Selectable working modes

Working mode can be set to either "Power" for maximum power or to "Economy" for energy saving operations. Combined with a choice between automatic or manual working mode, this lets the operator select the optimum machine power configuration for the work at hand.

Palm Command Control System (PCCS)

Remote safety lock levers

Superior visibility on blade and ripper

Lower operating costs

Komatsu ICT contributes to the reduction of operating costs by assisting to comfortably and efficiently manage operations. It raises the level of customer satisfaction and the competitive edge of our products.

Widescreen monitor

Conveniently customisable and with a choice of 26 languages, the widescreen monitor with simple switches and multifunction keys gives fingertip access to a large range of functions and operating info. An AdBlue® level gauge is now incorporated into the default main screen.

An evolutionary interface

Helpful information is now easier than ever to find and understand with the upgraded monitor interface. The main screen can be simply optimised to the operator's preference by just pressing one button.

At a glance: operation logs

Adjustable idle shutdown automatically turns off the engine after it idles for a set period of time

Operator identification function

Automatic gearshift mode to further reduce fuel consumption

Eco-gauge, Eco guidance and fuel consumption gauge

Fuel consumption history

Information & communication technology

Knowledge

You get quick answers to basic and critical questions about your machines – what they're doing, when they did it, where they're located, how they can be used more efficiently and when they need to be serviced. Performance data is relayed by wireless communication technology (satellite, GPRS or 4G depending on model) from the machine to a computer and to the local Komatsu distributor – who's readily available for expert analysis and feedback.

Convenience

Komtrax enables convenient fleet management on the web, wherever you are. Data is analysed and packaged specifically for effortless and intuitive viewing in maps, lists, graphs and charts. You can foresee eventual maintenance issues and required spare parts, and troubleshoot a problem before Komatsu technicians arrive on site.

KOMTRAX

The way to higher productivity

Komtrax uses the latest wireless monitoring technology. Compatible on PC, smartphone or tablet, it delivers insightful and cost saving information about your fleet and equipment, and offers a wealth of information to facilitate peak machine performance. By creating a tightly integrated web of support it allows proactive and preventive maintenance and helps to efficiently run a business.

Power

The detailed information that Komtrax puts at your fingertips 24 hours a day, 7 days a week gives the power to make better daily and long-term strategic decisions – at no extra cost. Problems can be anticipated, maintenance schedules customised, downtime minimised and machines kept where they belong: working on the jobsite.

Tough and reliable

Sturdy, rugged design

A high-rigidity hull structure main frame improves durability and reduces stress concentration at critical areas. The track frame with a large cross section utilises pivot shaft mounting for greater reliability. All hydraulic piping is robustly protected by cover and inner route to ensure damage protection from materials.

Low-drive "PLUS" undercarriage

Komatsu's low-drive Parallel Link Undercarriage System (PLUS) is extraordinarily tough, with excellent grading performance and stability. It features PLUS link assemblies, a highly reliable floating bushing concept, substantial track link height, superior oil seals and track guards that maximise undercarriage durability. For easier servicing, the equaliser bar's centre pin is remotely greased. The segmented sprockets are notched to considerably improve the evacuation of mud and further increase the PLUS undercarriage lifetime.

Stable in any configuration (EXi/PXi)

For complete stability in any working condition the D65EXi/PXi-18 is available in 2 different PLUS undercarriage configurations. On rocky ground, the EXi undercarriage, with small-width shoes, ensures maximum contact area between the machine and the ground. The PXi version has the widest undercarriage shoes and is ideal for soft surfaces.

Protected hydraulic piping

Komatsu has designed the hydraulics of the working equipment so it minimises maintenance costs. All the hydraulic lines are well protected with special linings and embedded into the steel structures whenever possible.

Modular power train

All the power train components are enclosed in a sealed module. This eliminates oil spills during mounting and dismounting, and prevents dust and dirt polluting individual components. Servicing is much cleaner, smoother and easier.

Rotating bushings

Self-adjusting idler support

Hydraulic lines are embedded into the structures whenever possible

Modular power train

Easy maintenance

Reversible radiator fan

The radiator can be easily cleaned by utilisation of the reversible, hydraulically driven cooling fan from a touch on the monitor panel. This cleaning reduces fuel consumption and increases overall machine performance.

Komatsu Care

Komatsu Care is a maintenance program that comes as standard with your new Komatsu machine. It covers factory-scheduled maintenance, performed with Komatsu Genuine parts by Komatsu-trained technicians. Depending on your machine's engine, it also offers extended coverage of the Komatsu Diesel Particulate Filter (KDPF) or the Komatsu Diesel Oxidation Catalyst (KDOC), and of the Selective Catalytic Reduction (SCR). Please contact your local Komatsu distributor for terms and conditions.

Central service points

Komatsu designed the D65EXi/PXi-18 with centralised and conveniently located service points to make necessary inspections and maintenance quick and easy. Newly integrated oil and coolant sampling ports simplify the sampling process.

Self-diagnostic monitor

The multifunction monitor panel displays the running time, engine revs, fuel level and water coolant temperature in real time. It also provides the operator with maintenance and service information, if oil filters need replacing or any abnormality occurs. In addition, it supplies Komatsu mechanics with detailed information, with no need for external service tools.

Self-diagnostic monitor

Safety first

Optimal jobsite safety

Safety features on the Komatsu D65EXi/PXi-18 comply with the latest industry standards and work in synergy to minimise risks to people in and around the machine. Seat belt caution indicator, secondary engine shutdown switch and audible travel alarm as well as handrails and tie-off points further increase safety.

LED lighting system

Long life, high lumen LED lights are standard on the machine. They are ideally positioned to give an optimal illumination of the work area.

Tie-off points

Tie-off points have been installed on the cab roof and engine hood for connecting workers' safety belts during maintenance and cleaning tasks, ensuring secure operations.

Rear-view camera system

The rear-view monitor gives the operator a clear view of the rear area of the machine or the ripper. This allows to focus on the work at hand, even in low light conditions.

Specifications

Engine

Model	Komatsu SAA6D114E-6
Type	Common rail direct injection, water-cooled, emissionised, turbocharged, after-cooled diesel
Engine power	
at rated engine speed	1950 rpm
ISO 14396	164 kW / 220 HP
ISO 9249 (net engine power)	162 kW / 217 HP
No. of cylinders	6
Bore × stroke	114 × 144.5 mm
Displacement	8.85 l
Fan drive type	Hydraulic, reversible
Lubrication system	
Method	Gear pump, force lubrication
Filter	Full flow
Fuel	Diesel fuel, conforming to EN590 Class 2/ Grade D. Paraffinic fuel capability (HVO, GTL, BTL), conforming to EN 15940:2016

Max. travel speeds

	Forward	Reverse
1st	3.6 km/h	4.4 km/h
2nd	5.5 km/h	6.6 km/h
3rd L	7.2 km/h	8.6 km/h
3rd	11.2 km/h	13.4 km/h

Steering system

Type	Hydrostatic Steering System (HSS)
Steering control	PCCS-lever
Service brakes	Wet, multiple-disc, pedal-controlled, spring-actuated and hydraulically released
Minimum turning radius (counter-rotation) (as measured by track marks on ground)	
D65EXi-18	1.9 m
D65PXi-18	2.2 m

TORQFLOW transmission

Type	Komatsu TORQFLOW
Torque converter	3-element, 1-stage, 2-phase, water-cooled, automatic lock-up
Transmission	Planetary gear, multiple-disc clutch hydraulically actuated, force-lubricated
Gearshift lock lever and neutral safety switch prevent accidental starts	

Environment

Engine emissions	Fully complies with EU Stage V exhaust emission regulations
Noise levels	
LwA external	108 dB(A) (2000/14/EC Stage II)
LpA operator ear	78 dB(A) (ISO 6396 dynamic test)
Vibration levels (EN 12096:1997)	
Hand/arm	≤ 2.5 m/s ² (uncertainty K = 0.94 m/s ²)
Body	≤ 0.5 m/s ² (uncertainty K = 0.29 m/s ²)
Contains fluorinated greenhouse gas HFC-134a (GWP 1430). Quantity of gas 0.9 kg, CO ₂ equivalent 1.29 t	

Service refill capacities

Fuel tank	415 l
Radiator	58 l
Engine oil	30.5 l
Torque converter, transmission, bevel gear and steering system	48 l
Final drive (each side)	
D65EXi-18	24 l
D65PXi-18	27 l
Work equipment hydraulics	62 l
Multishank ripper	7 l
AdBlue® tank	23.5 l

Specifications

Final drive

Type	Spur and planetary gear, double-reduction
Sprocket	Segmented sprocket teeth are bolt-on for easy replacement

Undercarriage

Suspension	Oscillating equaliser bar and pivot shaft
Track roller frame	Monocoque, large section, durable construction
Rollers and idlers	Lubricated track rollers
Tracks	PLUS link assembly
Track tension	Combined spring and hydraulic unit

D65EXi-18

Type of blade	Sigmodozer®
Number of track rollers (each side)	7
Number of shoes (each side)	42
Shoe width (standard)	610 mm
Ground contact area (ISO 16754)	36234 cm ²
Ground pressure* (ISO 16754)	0.53 kg/cm ²
Track gauge	1880 mm
Length of track on ground	2970 mm

D65PXi-18

Type of blade	Straight tilt
Number of track rollers (each side)	8
Number of shoes (each side)	45
Shoe width (standard)	915 mm
Ground contact area (ISO 16754)	59935 cm ²
Ground pressure* (ISO 16754)	0.35 kg/cm ²
Track gauge	2050 mm
Length of track on ground	3275 mm

* Including blade, ROPS cab, hydraulic control unit, operator, standard equipment, rated capacity of lubricant, coolant, and full fuel tank.

Dozer equipment

	Overall length with blade	Blade capacity	Blade width × height	Max. lift above ground	Max. drop below ground	Max. tilt adjustment	Assembly weight
D65EXi-18 Sigmodozer®	5490 mm	5.61 m ³	3410 × 1425 mm	1135 mm	620 mm	870 mm	2400 kg
D65EXi-18 Semi-U	5725 mm	5.61 m ³	3470 × 1425 mm	1105 mm	550 mm	870 mm	2080 kg
D65PXi-18 Straight tilt	5680 mm	3.69 m ³	3980 × 1100 mm	1130 mm	570 mm	890 mm	2150 kg

Blade capacities are based on the SAE recommended practice J1265.

Operating weight (appr.)

Including blade, ROPS cab, hydraulic control unit, operator, standard equipment, rated capacity of lubricant, coolant, and full fuel tank	
D65EXi-18 with Sigmodozer®	21700 kg
D65PXi-18 with Straight tilt	23100 kg

Hydraulic system

Type	CLSS (closed-centre load sensing system)
All spool valves externally mounted beside the hydraulic tank	
Main pump	Variable displacement piston pump
Maximum pump flow	255 l/min
Relief valve setting	285 kg/cm ²
Control valve positions for Sigmodozer® or straight tilt dozer	
Blade lift	Raise, hold, lower and float
Blade tilt	Right, hold and left
Additional control valve positions for multishank ripper	
Ripper lift	Raise, hold and lower
Ripper tilt	Increase, hold and decrease

Number of cylinders × bore

Type of blade	Sigmodozer®	Straight tilt Semi-U
Blade lift	2 × 90 mm	2 × 90 mm
Blade tilt	-	1 × 125 mm
Blade tilt/pitch	2 × 125 mm	-
Blade angle	-	-

Machine dimensions

	D65EXi-18 Sigmadozer®	D65EXi-18 Semi-U	D65PXi-18 Straight Tilt
A	5490 mm	5540 mm	5680 mm
B	1880 mm	1880 mm	2050 mm
C	3325 mm	3325 mm	3325 mm
D	2970 mm	2970 mm	2970 mm
E	2970 mm	2970 mm	3275 mm
F	610 mm	610 mm	915 mm
G	65 mm	65 mm	65 mm

Ground clearance: 415 mm (+ grouser height)

Multishank ripper

Type	Hydraulically controlled parallelogram ripper
No. of shanks	3
Weight (including hydraulic control unit)	1920 kg
Ripper cylinder	1 × 125 mm
Beam length	2170 mm
Maximum lift above ground	640 mm
Maximum digging depth	590 mm

Standard and optional equipment

Engine and related parts

Komatsu SAA6D114E-6 turbocharged common rail direct injection diesel engine	●
EU Stage V compliant	●
Starter motor 24 V / 7.5 kW	●
Alternator 24 V / 90 A	●
Batteries 2 × 12 V / 200 Ah	●
Intake pipe with precleaner	●
Cooling fan, hydrostatic driven with reversing function	●
