Promotion on 2000-hour kits

10% off!

Komatsu super-coolant

Don't be frozen out this Winter!
Specifically formulated to meet the quality standards of Komatsu machinery.

Promotion

5% off!

Have it remanufactured, not repaired!

Komatsu Reman products are put through extensive performance tests to provide you with an 'as new' performance and full warranty. Save up to 40% or more on the cost of a new component!

Reman Components include - Starter Motors, Alternators, Turbochargers and much more!

Save up to

40%

Wiper Blades

Poor visibility can be the cause of on-site accidents and inconsistent work quality. Don't let the poor weather give your company a bad name.

Marubeni Komatsu Ltd stocks a full range of wiper-related parts for quick delivery.

- Wiper Blades
- Wiper Motors
- Wiper Assemblies

Pricing as low as

£35.26

Critical connections

Genuine hose assemblies and connections are engineered specifically for Komatsu machinery. Non-genuine options are likely not to fit properly or perform as well.

Don't risk major failure!

Don't lose ground!

Our range of Camso Rubber Tracks are a one-piece system, strengthened with an inner core and designed to be lightweight but robust.

- Low vibration levels for less noise
- Reduced mud packing for better traction
- Heavy resistance to punctures and core corrosion

Available for non-Komatsu utility excavators!

Free delivery!

Remaufactured Long Block

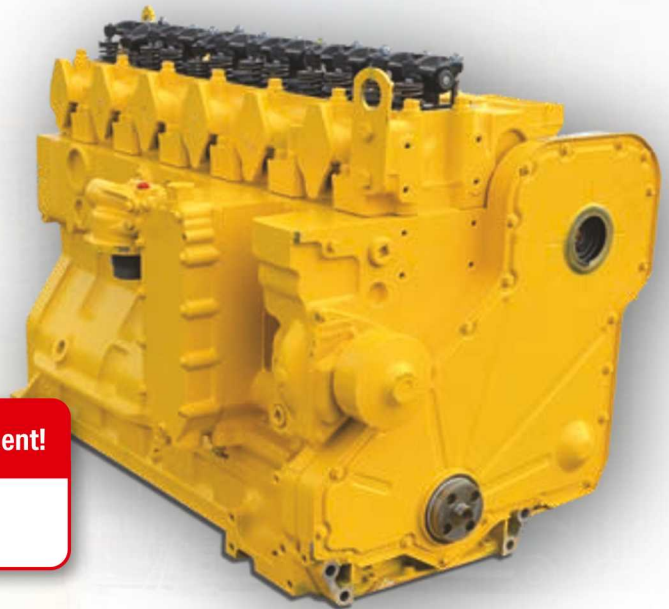

A Long Block is a cost-effective alternative to a complete engine replacement. All components are factory-remanufactured with all critical engineering upgrades meeting strict OEM standards. Backed by an 'as-new' warranty. Depending on the size of the machine/engine, a Long Block can include:

- Cylinder head
- Cylinder block
- Pistons & Con-Rods
- Oil Pump

and much more!

Less waste is better for the environment!

Save money!

Ultra-durable tracks

Abrasion Impact Resistant Tracks (AIR Tracks) are designed specifically for Dozers working in hard, rocky applications. Reinforced to provide a lifetime up to 20% longer than non-genuine undercarriage.

Don't buy cheap non-genuine tracks only for it to fail after 1000-hours!

**Up to 20%
longer lifetime**

Komatsu chain-on rubber pads for utility machines

Track pads are a tougher, more durable solution for utility excavators compared to a standard rubber track. Easy to install and to replace individual track pads.

Ideal for 5-tonne to 9-tonne excavators on long term projects.

Special offer

10% off

Kprime – the tooth system that stays sharp after 300 hours

The revolutionary Komatsu tooth system for excavators and wheel loaders.

- Lower fuel costs thanks to superior penetration
- Safe and hammerless tooth replacement
- Reusable fastener
- Reversible tooth

Convert now to the Kprime tooth system and get the required adapters for free!*

*Offer applies to buckets equipped with 3rd party tooth system & purchase of complete first-fit-kit (adapter, tooth, lock).

Predict the future!

A Dozer's undercarriage not only represents 50% of its lifetime maintenance expenses but it also suffers the most abuse from obstacles like rocks and water. An undercarriage inspection conducted by our PSSRs can provide a detailed report predicting the remaining lifetime of your undercarriage components.

If you own 3 × Komatsu Dozers or more!

Free of charge!
