

**MX-SD* TREAD PATTERNS:
FOR SMALL UTILITY EXCAVATORS**

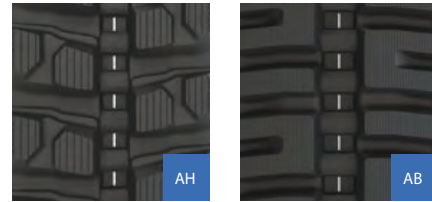

*Come with 18 months warranty

MX-HXD* TREAD PATTERNS:

FOR EXTREME RESISTANCE TO SEVERE CONDITIONS

*Come with 30 months warranty

Purpose-built for harsh or extreme heavy-duty applications
Maximises uptime and offers 30% more service life

Much thicker tread than most OEM tracks

More rubber offers more protection on carcass puncture and edge cutting
This translates into longer service life and less downtime

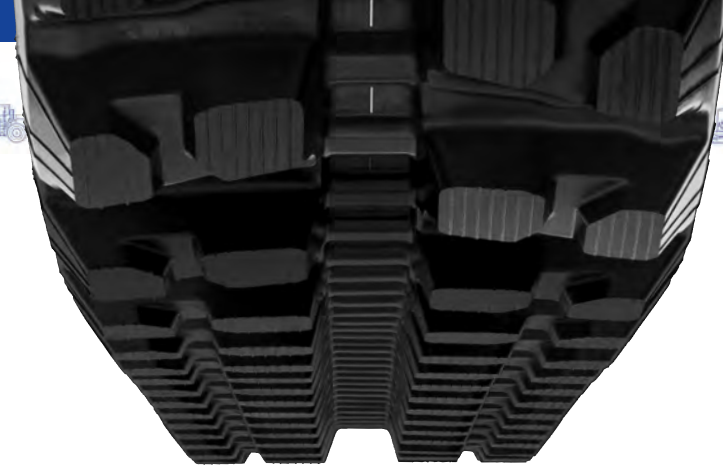

High-tensile, rubber-sealed steel cables

Protected by heavy-duty carcass and tread

NO BETTER TRACK

FOR SUPERIOR COST-PER-HOUR PERFORMANCE AND PEACE OF MIND

Here at Marubeni-Komatsu, we are committed to lowering operating costs while providing world-class productivity for our machines. As a result, we have a long history of offering our customers quality products with the latest technology.

So we formed a partnership with Camso (formerly Camoplast) to supply the definitive rubber track system for your entire fleet, not just on your Komatsu machines. We're proud to be the first name to come to mind for our superior machines - and now we have the rubber tracks to match their performance. Manufactured to be harder wearing, the tracks are robust and have a longer life span thanks to their revolutionary 3S internal iron core.

Rubber tracks supplied by Marubeni-Komatsu are suitable for:

- MINI-EXCAVATORS
- COMPACT TRACK LOADERS
- SKID STEER LOADERS
- CARRIERS

CONTACT THE EXPERTS FOR MORE INFORMATION OR A QUOTE:

Catastrophic failure by metal bar pull-out? **NO!**

CURBSHIELD TECHNOLOGY:
Extends service life prior to track degradation process triggered by edge cutting leading to iron core corrosion

Cable breakage failure? **NO!**

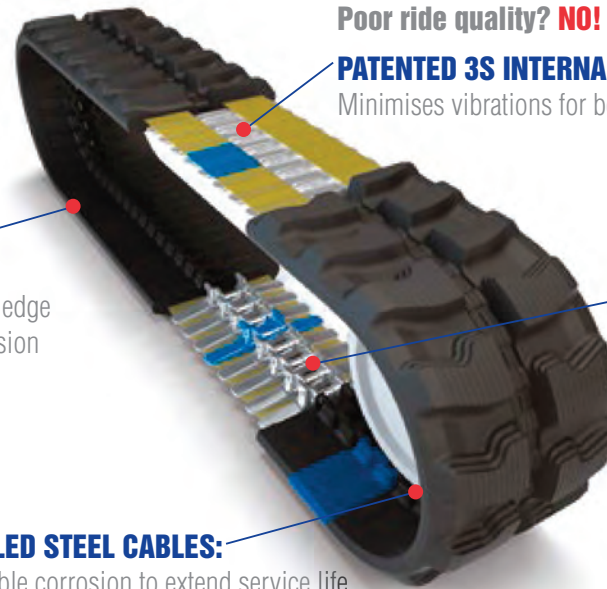

HIGH-TENSILE, RUBBER-SEALED STEEL CABLES:
Resists carcass punctures and cable corrosion to extend service life

Poor ride quality? **NO!**

PATENTED 3S INTERNAL IRON CORE:
Minimises vibrations for better ride quality and lower maintenance cost

De-tracking? **NO!**

PATENTED 3S INTERNAL IRON CORE:
Avoids de-tracking creating unexpected downtime on job site and the beginning of the degradation process

SUPPLIED WITH MINIMUM 18 MONTHS WARRANTY
